

LAX

Los Angeles World Airports

Noise Alert

Issue Date: 10/4/2017

LOS ANGELES INTERNATIONAL AIRPORT (LAX)
DEVIATION FROM OVER-OCEAN OPERATIONS
October 10 - 15, 2017
12 AM – 6:30 AM

LAX will temporarily deviate from Over-Ocean Operations for six nights (12 AM – 6:30 AM) from Tuesday, October 10th through Sunday, October 15th due to the closure of both runways on the north complex. The north outboard runway 24R/6L is scheduled to close for 30 days (October 9th to November 7th) for runway repair while the north inboard runway 24L/6R will be closed during these six nights for other repair work.

Whenever possible, the FAA transitions [LAX air traffic flow](#) to Over-Ocean Operations from 12 AM to 6:30 AM, wherein aircraft arrive and depart over the ocean to minimize noise disturbance to the communities directly east of the airport. During this traffic flow, the south runway complex is utilized primarily for departures while the north runway complex is utilized primarily for arrivals.

With both runways closed on the north complex, the FAA will need to deviate temporarily from Over-Ocean Operations, maintain air traffic in Westerly Operations, and direct all aircraft operations to the south runway complex during these six nights. As a result, persons living near the airport may notice a change in aircraft flight activity and associated noise.

Thank you for your understanding and patience during this temporary situation.
